

# New funnel. New options.

We're happy to introduce new funnels for the original Interactive Cup® Brewer that make it possible to offer Starbucks® Blonde Roast coffees like Veranda Blend®.

## Instructions for switching funnels

1. If the existing brew funnel has a retaining clip that holds the water hose in place, unclip the water hose. If there is no retaining clip, move on to step 2.
2. Lift water hose out of brew funnel.
3. Remove current brew funnel from brew group by pulling up.
4. Wipe chamber clean.
5. If applicable, remove retaining clip from the existing brew funnel and attach it to the new brew funnel.
6. Replace new funnel in brew group with notch facing the water hose.
7. Attach water hose to the retaining clip if applicable.
8. Run 2–3 test brews.

To order funnels (part number 10BRE64), contact Cafection at [salesorder@cafection.com](mailto:salesorder@cafection.com).

**If you need more information or have any questions, please contact your Starbucks representative.**
